

PROJECT SANCTUM

THE NETWORK THAT PRETENDS NOT TO EXIST

PROJECT SANCTUM is a network that refuses to look like one. It hides behind an abandoned shortwave blog; a three-click ritual and a four-digit frequency open the door. Inside, three rites — **Signal**, **Focus**, **Choice** — test how you listen, hold and decide, and every verdict detonates into its own proof game. A living Field Log tracks nineteen quests. Finish the rites and a Ceremony forges your rank, callsign, and a sigil grown from your own play; the Departure walks you back out through the ring. Press ~ and everything vanishes. The Empire surveils the obvious. **We hide in plain sight.**
